Chem. 55 MW 1730 Lab.
Monday, November 29, 2004

1. The $\text{H}_3\text{PO}_4$/NaH$_2$PO$_4$ quiz is today.

2. The $\text{H}_3\text{PO}_4$/NaH$_2$PO$_4$ report is due today at the end of the period.

3. Because of the limited time and instrument availability I have decided that you need only do one or the other of the instrument calibration and the solution certification experiments – you do not need to do them both.

4. I will endeavor to put all of my recent handouts on the following URL:
   
   www.chemistry.sjsu.edu/rterrill

5. Modified procedures for the “Ascorbic Acid by Voltammetry” experiment are available.

6. Just two regular lab sessions remain, but some additional time is possible:
   a. Monday 11/29 quiz $\text{H}_3\text{PO}_4$/NaH$_2$PO$_4$ due
   b. Wed 12/1
   c. Monday 12/6 Cl – ISE due
   d. Wed 12/8 check out very limited time HPLC / Vit-C due
